Collapse menu

Allow PHP ☐ Execute PHP code (wrapped in `<?php ?>`)

Allow Shortcodes ☐ Execute shortcodes

Size width px height px ☐ reserve this space

Layout / Output

Everything connected to the ads layout and output.

Position ☒ default ☐ ☐ ☐

☐ Check this if you don't want the following elements to float around the ad. (adds a clearfix)

Margin top: px right: px bottom: px left: px

tip: use this to add a margin around the ad

Container ID

Specify the id of the ad container. Leave blank for random or no id. An id-like string with only letters in lower case, numbers, and hyphens.

Container Classes

Specify one or more classes for the container. Separate multiple classes with a space.

Enable Debug Mode ☐ Manual

2. set this class globally to `display: none`

Customizing Additional CSS

Add your own CSS code here to customize the appearance and layout of your site. [Learn more about CSS](#) ➔

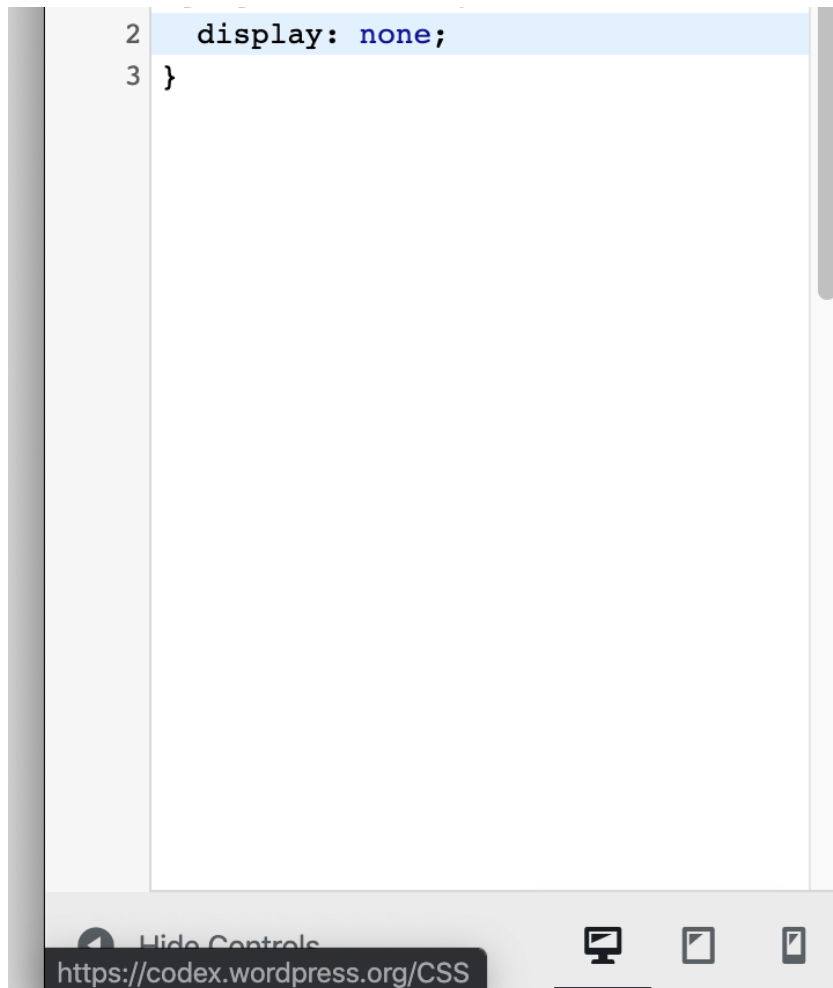

When using a keyboard to navigate:

- In the editing area, the Tab key enters a tab character.
- To move away from this area, press the Esc key followed by the Tab key.
- Screen reader users: when in forms mode, you may need to press the Esc key twice.

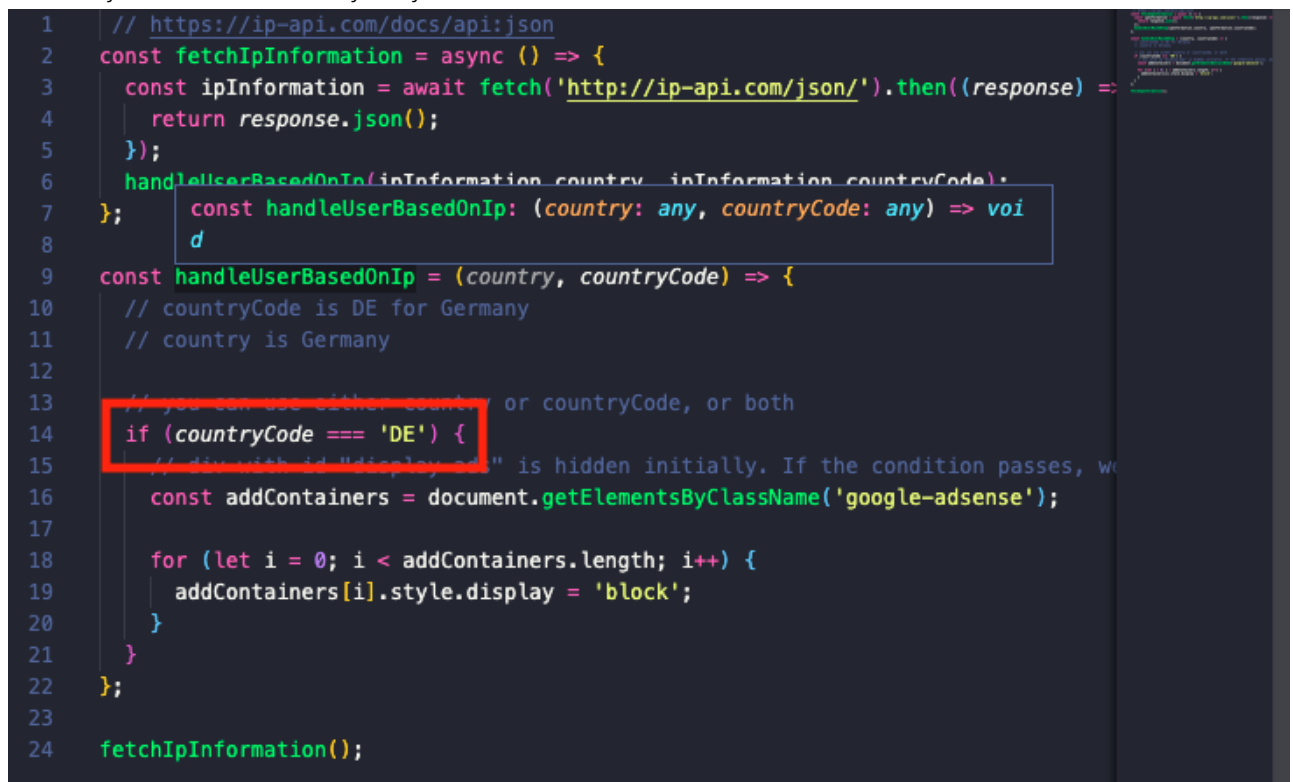

The edit field automatically highlights code syntax. You can disable this in your [user profile](#) ➔ to work in plain text mode.

[Close](#)

1 .google-adsense {

3. edit the `show-ads-by-ip.js` to your liking. For this example, I'm showing the ads to all users from Germany and hide it for everybody else.

4. upload `show-ads-by-ip.js` via FTP to your `/wp-content`-folder

Name	Ext	Größe	bearbeitet	Art	Name	Ext	Größe	bearbeitet	Art
..					..				
.git					wp-admin				
documentation					wp-content				
.DS_Store					wp-includes				
index.html					.htaccess				
show-ads-by-ip.js					index.php				
					license.txt				
					liesmich.html				
					readme.html				
					wp-activate.php				
					wp-blog-header.php				

5. install Header and Footer Scripts plugin

Last Updated: 9 months ago

Untested with your version of WordPress

6. find the pulugin under Settings --> Header and Footer Script

The screenshot shows the WordPress dashboard's 'Plugins' page. On the left, the 'Settings' menu is expanded, with 'Header and Footer Scripts' selected. The main area displays two plugins:

- Insert Headers and Footers** by WPBeginner: This plugin allows you to add extra scripts to the header and footer of your blog by hooking into wp_head and wp_footer. It has 77 ratings, 900,000+ active installations, and is compatible with your version of WordPress. It was last updated 3 weeks ago.
- Ad Inserter - Ad Manager & AdSense Ads** by Igor Funa: Manage Google AdSense, Media.net, Amazon banners, ads.txt, ad rotation, sticky widgets, AMP ads, DFP, tracking, etc. It has 1,283 ratings, 200,000+ active installations, and is compatible with your version of WordPress. It was last updated 2 weeks ago.

On the right side, there are two more plugin cards: a blue one with two bars and a purple 'GDPR Cookie Consent' one.

7. Paste this line: `<script src="/wp-content/show-ads-by-ip.js"></script>` in the header section

The screenshot shows the 'Header and Footer Scripts - Options' page. The 'Scripts in header' field contains the code `<script src="/wp-content/show-ads-by-ip.js"></script>`. A red arrow points from this code to the 'Save settings' button at the bottom. The page also includes a 'Scripts in footer' field and a 'Save settings' button.

Thank you for using Advanced Ads. Stay informed and receive 2 free add-ons for joining the newsletter. [Add me now](#)

Scripts in header:

`<script src="/wp-content/show-ads-by-ip.js"></script>`

Above script will be inserted into the `<head>` section.

Scripts in footer:

Above script will be inserted just before `</body>` tag using `wp_footer` hook.
